

Multilateral Special Agreement RID

Multilateral Special Agreement Number	RID 3/2010	
Title	Multilateral Agreement RID 3/2010 under section 1.5.1 of RID on the carriage of certain wastes containing dangerous goods	
	Signatory States	Date of signature
	Austria	19.07.2010
	Liechtenstein	23.07.2010
	Luxembourg	08.09.2010

**Multilateral Agreement RID 3/2010 under section 1.5.1 of RID
on the carriage of certain wastes containing dangerous goods**

1 Introduction

- 1.1 This Agreement shall apply only in connection with the collection and carriage of wastes in line with the applicable waste legislation framework.
- 1.2 By derogation from the provisions of RID, the carriage of wastes which are dangerous goods or which contain dangerous goods is allowed under the conditions of sections 2 to 7 below.
- 1.3 This Agreement shall not apply to the carriage of wastes of classes 1, 6.2 and 7.

2 Classification

2.1 Simplified Assignment

The assignment according to 2.1.3.5.5 RID may also be applied to

- a) UN 1950 waste aerosols and
- b) the classification as a liquid substance, if the development of a liquid phase cannot be excluded.

2.2 Admixture of other material by mistake

Where, according to RID, wastes are assigned to a UN number or are not subject to the provisions of RID, an admixture by mistake of items of waste with a different classification need not be taken into account if no dangerous reaction and no essential impact on the degree of danger of the total load is to be expected from the admixed material.

2.3 Medicines

Special provision 601 of Chapter 3.3 of RID shall also apply to wastes of medicines if they are no longer packed in packagings of a type intended for retail sale or distribution.

3 Packaging

- 3.1 The packagings specified in Table A of Chapter 3.2 for the relevant UN number shall be used.
- 3.2 For the following wastes, packagings which have expired or have not been tested may also be used:
 - a) Dangerous wastes of Packing Group III.
 - b) Dangerous wastes of Packing Group II, which correspond to the wastes defined in the table in the Annex to this Agreement according to their UN number and description.
- 3.3 The packagings may have buckles and dents. Their condition and content as well as the manner of carriage shall not endanger the compliance with the protection provisions of section 4.1.1 of RID.

4 Carriage in bulk

For the carriage in bulk the following derogations shall apply:

- 4.1 UN 1950 waste aerosols, except those leaking or severely deformed, may be carried in closed or sheeted wagons, closed containers or sheeted large containers in bulk.

They need not be protected against inadvertent discharge provided that measures to prevent dangerous build up pressure and dangerous atmospheres are addressed.

It shall be assured by means of constructional or other measures (such as the use of absorbent material or leak proof tray) that there will be no leakage of liquids from the load compartments of wagons or containers during carriage.

Before loading, the load compartments of wagons or containers, including their equipment, shall be inspected for damage. Wagons or containers with damaged load compartments shall not be loaded. The load compartments of wagons or containers shall not be loaded above the top of their walls.
- 4.2 Wastes of UN 3175 may be carried in bulk in closed wagons and closed containers with adequate ventilation.

5 Marking of packages

The provisions of chapter 5.2 of RID on marking of packages shall apply with the following derogations:

- 5.1 The labels may be attached to the package as prescribed in 5.2.2.1.6 RID, last sentence, including in such cases, where the requirements specified in the provision referred to are not met.
- 5.2 The environmentally hazardous substance mark is not required.

6 Information in the dangerous goods transport document

The provisions of section 5.4.1 of RID on the information in the transport document shall apply with the following derogations:

- 6.1 The quantity of dangerous goods according to 5.4.1.1.1 (f) RID may be estimated.
- 6.2 For empty means of containment according to 5.4.1.1.6 RID, a sufficient distinctive general description of the dangerous load or of a part of it concerned may be indicated instead of specifications according to 5.4.1.1.1 (e) RID, without indicating the number of items.
- 6.3 The additional inscription "environmentally hazardous" according to 5.4.1.1.18 RID is not required.
- 6.4 The following additional entry shall be made in the transport document: "Carriage agreed under the terms of 1.5.1 RID (RID 3/2010)"

7 Other Provisions

All other relevant provisions of RID shall apply.

8 Scope

This agreement shall apply from 2nd August 2010 up to 1st August 2015 to transport on the territory of the OTIF Member States which have signed this agreement unless it is revoked before that date by at least one of the signatories, in which case it shall remain applicable only for transport on the territory of the OTIF Member States which have signed but not revoked this agreement, on their territory, up to that date.

Done in Vienna, the 19th July 2010

The competent authority for RID
in the Republic of Austria:

Mag. Othmar Krammer

Annex - The facilitating provisions according to 3.2 b) of this Agreement
may be used only for wastes which comply with the entries of this table

UN-No.	Name according to RID	Restricted to wastes of adjacent description
1263	PAINT	Lacquer- and paint sludge and paint- and lacquer dilution; solvent based (liquid phase is possible)and/or containing heavy-metals and not completely cured residues in packagings
1268	PETROLEUM DESTILLATES, N.O.S. or PETROLEUM PRODUCTS, N.O.S.	Petroleum
1325	FLAMMABLE SOLID, ORGANIC, N.O.S.	Packagings with dangerous impurities, predominantly organic
1759	CORROSIVE SOLIDS, N.O.S.	Packagings with corrosive contents, solid
1866	RESIN SOLUTION	Resin residues, non cured
1992	FLAMMABLE, LIQUID, TOXIC, N.O.S.	Solvent based mixtures or sludges, halogenated
1993	FLAMMABLE, LIQUID, N.O.S.	Cleaner solvent
1993	FLAMMABLE, LIQUID, N.O.S.	Solvent based mixtures or sludges, without halogenated compounds (liquid phase possible)
2588	PESTICIDE, SOLID, TOXIC, N.O.S	Packagings with toxic contents, solid
2811	TOXIC SOLID ORGANIC, N.O.S	Packagings with toxic contents, solid
3021	PESTICIDE, LIQUID, FLAMMABLE, ORGANIC, TOXIC, N.O.S.	Pesticides and insecticides
3088	SELF-HEATING SOLID, ORGANIC, N.O.S.	Filter materials, filters bags with custom-designed dangerous constituents, predominantly inorganic
3175	SOLIDS CONTAINING FLAMMABLE LIQUID, N.O.S.	Oily wastes from garages
3175	SOLIDS CONTAINING FLAMMABLE LIQUID, N.O.S.	Packagings with dangerous impurities, predominantly organic
3175	SOLIDS CONTAINING FLAMMABLE LIQUID, N.O.S.	Solvent based solids or mixture of solids without halogenated compounds (self inflammable)
3243	SOLIDS CONTAINING TOXIC LIQUID, N.O.S.	Packagings with toxic contents, liquid
3244	SOLIDS CONTAINING CORROSIVE LIQUID, N.O.S.	Packagings with corrosive contents, liquid
3264	CORROSIVE, LIQUID, ACIDIC, INORGANIC, N.O.S.	Acids and acid-mixture with custom-designed constituents
3266	CORROSIVE, LIQUID, BASIC, INORGANIC, N.O.S	Liquors and liquors mixture with custom-designed constituents
3286	FLAMMABLE LIQUID, TOXIC, CORROSIVE, N.O.S.	Cleaning agent; marked as flammable, corrosive and less toxic
3288	TOXIC SOLID INORGANIC, N.O.S	Packagings with toxic contents, solid

**To all
Competent Authorities for RID**

Vienna, 19.07.2010

Multilateral Agreement RID 3/2010

Dear Sir or Madam,

RID 5/2005 concerning carriage of certain wastes containing dangerous goods expires on 2 August 2010.

Austria now initiates a follow up with these changes:

- The principles for simplified classification are now in 2.1.3.5.5 RID. Our draft therefore only extends them to UN 1950 waste aerosols and the classification as a liquid substance, if the development of a liquid phase cannot be excluded.
- The packaging provisions are reworded with the aim to allow also the use of packagings according to the appropriate packing instruction but with buckles and dents if it is not dangerous.
- For the carriage in bulk of UN 1950 waste aerosols the necessary safety requirements are now added.
- The mark and the future entry in the transport document for environmentally hazardous substances are explicitly not required.
- It is meanwhile allowed by 5.4.1.1.3 RID not to enter the technical name in the transport document. So this could be deleted. On the other hand, it is now up to the agreement to require a reference to it.
- According to preferences of the waste management industry the annexed table has a new format beginning with the UN-Nr and ending with the waste description.

Attached you will also find an additional table with the texts of RID 5/2005 and RID 3/2010, which is not part of the new agreement but which may help to make clear what is maintained and what has changed.

If you agree to the enclosed we would appreciate if you would countersign and return a copy of the agreement to this office and send another copy to the OTIF Secretariat.

Yours sincerely,

Enclosure
